

This report, which was prepared in accordance with the ICMM's assurance and validation principles and the "core" option of the GRI (Global Reporting Initiative) standards, aims to inform our stakeholders and the general public about our performance. It also seeks to share information on the way in which we are making progress in strengthening a mining operation based on principles in favor of sustainable development.

In order to offer a greater level of trust to the stakeholders and the general public in relation to the content of the Sustainability Report, we hired a company for the independent verification of the sustainability performance standards, applicable for the 2021 reporting period.

We carry out our productive activities with a focus on protecting people's health and lives, respecting the environment, ensuring social commitment, promoting human rights and operational efficiency.

Corporate governance structure

Minera San Cristóbal S.A. is a company incorporated in Bolivia in 2000. As of March 2009, we are a wholly-owned subsidiary of the Sumitomo Corporation, a multi-sector business conglomerate headquartered in Japan.

Ethical conduct

We carry out our activities within the framework of our management policy, our policy of mutual respect and ethical and legal principles, and avoiding any act of corruption, i.e. any act that violates the laws in effect and the ethical values governing our company.
